

EVD5CE

Serial to NTSC/PAL or Component Converter

The EVD5CE provides low cost, all digital conversion of SDI to either composite or component analogue video. Three analogue BNC outputs are user configurable to cover a wide range of format combinations including 3 composite, 1 composite and Y/C, YPbPr (SMPTE, EBU-N10), Betacam, or RGB. The EVD5CE also features a re-clocked, loop-thru SDI output. The EVD5CE automatically adapts to PAL or NTSC video standards. Pedestal and narrow/wide H/V blanking are user configurable via dip-switches.
